

MODULAR PUMP SYSTEMS FOR FOGGING-SYSTEMS

ADVANTAGES OF THE MODULAR PUMP SYSTEMS

LUBING GreenTec modular pump systems for fogging systems are modularly designed so that they can be optimally adapted to the customer's requirements. With the intuitive touch screen control you have everything at a glance.

- durable stainless steel construction
- several compartments can be controlled separately
- various high-pressure modules can be freely combined
- energy-efficient high-pressure modules with frequency-controlled speed
- working pressure from 70 to 100 bar
- a modular pump system can supply up to 10 ha
- uncompromising quality and reliability
- modular expandability

SYSTEM COMPONENTS

High-pressure modules

- different pump sizes are available for each high-pressure module
- High-pressure modules in modular design

Booster module

- different versions for flow rates from 10 – 700 l/min
- direct access to control cabinet, controller, filters and booster pump

Filter unit

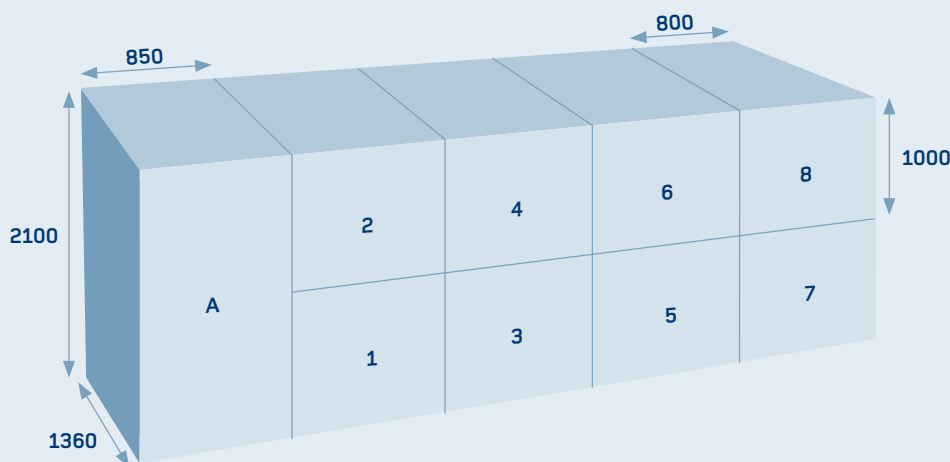

- clear arrangement and easily accessible for maintenance work
- central filter unit for particle-free water

Touch Controller

- interactive controller for control and monitoring of the entire pump systems
- easy operation via touch screen

MODULAR STRUCTURE

A system consists of:

- A: Booster module with pressure booster system, controller and filter
- 1 – 8: High-pressure modules
