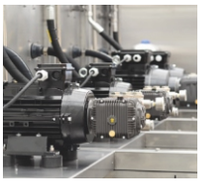
MODULAR PUMP-SYSTEMS FOR FOGGING-SYSTEMS

STABLE PRESSURE

LUBING GREENTEC Modular Pump-Systems deliver reliable high-pressure performance for precise and efficient fogging applications. Their modular design allows flexible adaptation to any system size. Durable components, energy-efficient technology, and an intuitive touch controller ensure stable performance and long-lasting quality.

SYSTEM COMPONENTS



HIGH-PRESSURE MODULES (01)

» Various pump sizes available
» Modular design

BOOSTER MODULES (02)

» Boosterpump ensures an optimal pre-pressure for the high pressure modules
» Direct access to control cabinet, controller, filters, and booster pump

FILTER UNIT (03)

» Clear, well-arranged layout
» Easy to maintain
» Central filtration for particle-free water

TOUCH CONTROLLER (04)

» Interactive control and monitoring of the entire system
» Simple touch-based operation

Suitable additions
FOGGING SYSTEM | PAD SYSTEM | PLASTIC PADS

ADVANTAGES

» Durable stainless-steel construction
» Separately controllable sections
» Freely combinable high-pressure modules
» Energy-efficient modules with frequency-controlled speed
» Operating pressure 70 to 100 bar
» One system supplies areas up to 10 ha
» Uncompromising quality and reliability
» Modular expandability
